

THE ATTACHMENT TO YOUR DIMENSIONS

application :

This type of boom is used, when easy and fast mounting onto the existing forks is required or fast changing of attachment is demanded.

technical characteristics :

- Standard models 1,3 to 5 metric tons (others on demand)
- chamfered or rounded tip
- can be positioned on floor without support
- Securing the attachment by using a bolt and a pin behind the forks bending point

Options :

- other shapes, lengths and diameters
- adjustable boom height
- special tip shapes
- preparation for camera integration
- Special coatings on boom's surface to secure the load
- semi-automatic locking system
