

THE ATTACHMENT TO YOUR DIMENSIONS

application :

Those forks are used, where there is a need to change frequently between attachment and fork (f. e. ports).

Change within a few minutes.

Changing forks with attachment or vice versa can be proceeded without high forces and safely (only 2 bolts and 2 pins have to be pulled).

Also attachments can be equipped with this system.

technical characteristics :

-different versions, cross sections, lengths and capacities on demand

-mountable on all forklifttrucks, that are equipped with an adequate carriage.

Options :

- additional wear zone
- coatings (Antislippage, Ex-proofed...)
- cranked forks
- Special shapes
