

THE ATTACHMENT AT YOUR DIMENSIONS

application :

Those forpositioners with integrated sideshift allow the sideshifting and positioning of the forks of the forklifttruck with optimum visibility and precise placement of the load.

technical characteristics :

- the BAROU model in reinforced version as standard = forks pin-guided and lower rollers and special cylinder dimensions
- integrated sideshift (only at max. and min. opening no sideshift possible)
- capacities from 2,5 up to 16 metric tons (others on demand)
- hook-on or ontegrated with ISO- or Pintype forks

Options :

- special version for small capacities (1 – 3 metric tons)
- Special widths and heights
- adaptable with and to various fork- and boom combinations
- with integrated weighing
- without sideshift
- special cylinders
- double pintype-version
