

THE ATTACHMENT AT YOUR DIMENSIONS

application :

Similar to the forkpositioners with separate sideshift the forks can be positioned very precise, and also the sideshift is available in min. and max. position of forks.

technical characteristics :

- the BAROU model in reinforced version as standard = forks are pinguided (no special wearzones needed ; also in hard applications)
- separate/permanent sideshift available
- capacities from 2,5 to 16metric tons (others on demand)
- integrated version with pintype forks on top

Options :

- special widths and heights
- adaptable with variopus fork- and boom combinations
- Special cylinders
